

DNRC Forestry Division Fire & Aviation Management Program

Mission Statement: We protect lives, property, and natural resources from wildfire by providing safe and effective services to Montana's citizens as well as leadership, coordination and resources to the State's 's wildfire services.

The Fire & Aviation Management Pre-Suppression program is a statewide year-round ongoing effort that results in the agency always being prepared to suppress wildland fires in Montana. The pre-suppression efforts include resources and personnel in the areas of Safety, Fire Business Management, and Preparedness. Preparedness is a broad term that includes several focus areas: Prevention and Education, Training, Communication, Equipment Development, and Support.
